

# Samankha Apartments

height: 36.2m

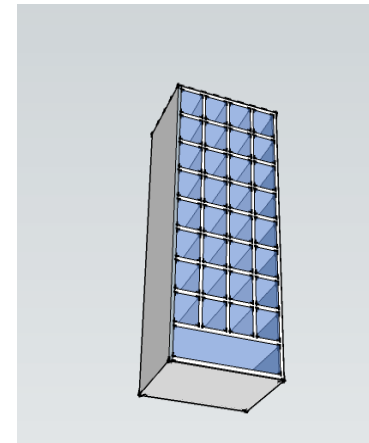

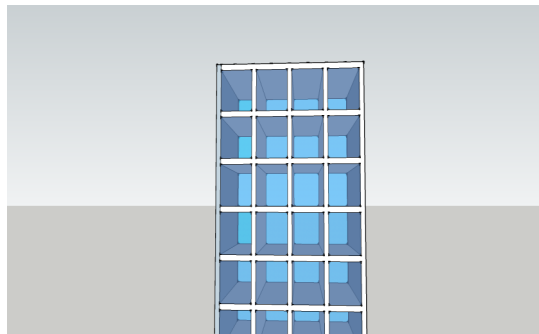

Surface of the bottom: 16.5m x 12.5m

9 levels et 27 apartments

Construction materials:

- Solar panels
- Thermal panels
- Loft insulations
- Underfloor heating
- Recycled materials (wood; cement)
- Triple glazed solar windows

Why is this building apart of sustainable development?

- We use solar energy by using solar panels and thermal panels
- We use recycled materials

Extra Details:

- The solar panels are located on the roof so the roof access is only available for emergencies and roofers
- Each apartment has two windows on each side
- There is underfloor heating on each floor/ level
- And in each ceiling there is a loft insulation
