

# JUST A REGULAR HOUSE

- mini recycling plant
- gutters that lead to large bucket, water is saved and used to water plants
- garden has fruits and vegetables growing
- windows made of thermal glass that store heat during the day, and when the house is cold, it releases the heat
- house itself made of recycled wood
- small garage at bottom of stairs and attic at the top
- first floor has kitchen and living room
- second floor has 2 bedrooms, 2 bathrooms, and an office
